Researcher Edwin Locke found that individuals who set specific, difficult goals performed better than those who set general, easy goals. Locke proposed five basic principles of goal-setting: clarity, challenge, commitment, feedback, and task complexity.

What is Goal-Setting Theory? - GoStrengths

strengths : what-is-goal-setting-theory

roleta com duas bolas

The 70-25-5 principle works like this:

Dedicate 70% of your time working in areas where you're strongest.

Give 25% of your time to working on things you want to improve.

Spend 5% of your time working on areas of weakness.
