With a cross-platform app, some or even all of the

source code can be shared across platforms, such as Android and iOS. As a result

, developers need to code mobile assets only once. These assets will work seamle

ssly on all platforms so they don't have to be recoded for each individual p

latform.

For Windows computers, you can use a USB cable to connect to t

he phone. and Tethering and then tap USB tethering.

Note: Tethering your computer to your smartphone can drain the phone's

battery, so make sure both devices are plugged into a power outlet while te

thering, and turn off the connections once you're done.
