There are five components of physical fitness: (1) body composition, (2) flexibility, (3) muscular strength, (4) muscular endurance, and (5) cardiovascular fitness.

Physical fitness would include activities that address all of the health-related components of fitness. Exercise guidelines recommend that adults should include activities that address all of the health-related components of fitness.

Overall, men (6.0 hours per week) spent more time than women (3.2 hours per week) in moderately intensive physical activity while at work. Overall, the amount of time spent walking at work on an average work day (in the last four weeks) was similar among men (1.9 hours) and women (1.7 hours).

Adult physical activity - NHS Digital. Overall, men (6.0 hours per week) spent more time than women (3.2 hours per week) in moderately intensive physical activity while at work. Overall, the amount of time spent walking at work on an average work day (in the last four weeks) was similar among men (1.9 hours) and women (1.7 hours).
