Running Call of Duty 4 without a graphics card can

be challenging, as the game typically requires a dedicated graphics

card to run smoothly. However, you may be able to run it using inte

grated graphics if your computer has a strong enough processor with integrated g

raphics capabilities.

The minimum system requirements for Call of Duty Advanced Warfare i

nclude an Intel Core i3-530 2.93GHz processor and 6GB of RAM. The i3 6006u 2.00G

Hz processor and 4GB of RAM in your system fall short of these requirements. It

is unlikely that you will be able to run the game smoothly with your

current setup.
