<p></p><p>The TL;DR version of this review is: surprising ligh
t, extremely pocketable, does the job, not my dream charger but at 🌧 , t
he price it s well worth it.</p>
<p>We ve covered a product of Lepow s before, the Moonstone. Like the Moon
stone, the Poki comes 🌧 , with a cloth carrying case that you can stash
a USB cable in (it appears to come with a 6 ‡ 🌧 , USB-> MicroUSB,) or
chuck your ID and credit card in and use it as a wallet while you re out. It s &
🌧 , actually the first thing that stood out when I was looking at the dev
ice. The Moonstone is still going strong 🌧 , with a friend of mine a yea
r later.</p>
<p>The battery delivers a 90% conversion efficiency rating according to sp
ecs on the 🌧 , manufacturer s website. Most batteries go from the high 7
0 s to mid 80 s. You want to see a higher number as 🌧 , this is how much
power gets delivered with the rest being lost in conversion.</p>
<p>The Poki can charge and recharge at 🌧 , 2.1amps. This means you
re not stuck for 20+ hours charging a 10,000mAh battery at 500mA. At 2.1 amp yo
u should 🌧 , be able to charge this in under five hours and with 90% con
version efficiency you should have around 9000mAh of 🌧 , actual juice to
spare. That should be enough for at least three complete charges from dead to f
ull for any 🌧 , smartphone on the market today.</p>
<p>2.1 amp charging also means you re not going to spend ~7 hours charging
a 3000mA phone 🌧 , from dead, more like an hour and a half if your phon
e supports it.charging that fast.</p>
<p></p>
