<p>Terrible game.</p>

<p>I just bought this, as 🌛 I was looking for a game that is exac
tly this premise. Alas, when I found this game, I bought it 🌛 and I was
extremely disappointed. Just loading up the game took forever, and I kept havin
g to close and reopen 🌛 it. When it finally opened, it took 17 minutes
just to do that. Yeah. Now it's not like I have 🌛 a terrible laptop
, my laptop is really good and I've never had any issues with such a thing.
Then, upon 🌛 opening the game, I couldn't look around because the d
efault settings were set to ultra. For the record, I don't 🌛 really
have an issue with game devs doing this, but it leaves a bitter taste in your m
outh. I had 🌛 to set the quality to very low and even then it was still
so laggy. It was 2 fps at 🌛 the most (like, not stretching the truth h) Tj T* BT /F

ite literally just pixels. The game was also very repetitive, so even if you hav
e a NASA super-computer 🌛 you will get bored of this really quickly. I
do not suggest this to anyone, no matter how enticing it 🌛 looks. It wa
s terrible and so incredibly frustrating; especially because I kept having to me
ddle with the settings and make 🌛 the game actually playable (spoiler a) Tj T* BT /F

so 🌛 happen to have amnesia this game would be quite enjoyable, but unf
ortunately I see a lot of people having the 🌛 same disappointment as I
am. I really wish I could have this refunded, even just half of the money I 
7771; spent on this. I'm unsure if Steam would let that happen, so for now
